COMPLEX PROJECTS IN CHICAGO

OCTOBER 24-26 2016

In Fall 2016, Archeworks and TU Delft co-presented the inaugural “Chicago Speakeasy” - a three-night discussion series with leading experts exploring Chicago’s past, present and future. The series captured the spirit - the geist - that inherently orders the city’s social, economic and spatial decisions. Each night featured speakers discussing the fundamental aspects that shape(d) Chicago joined by a group of Masters of Architecture students from TU Delft’s Complex Projects studying at Archeworks this semester. The transcriptions will be made into a publication slated for completion next year.
